DETAILED ACTION

Claim Objections

Claim 2 is objected to because of the following informalities: on line 7, the word "relate" should be replaced with the word --relative--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7-9, and 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Zweighaft (U.S. Patent No. 6,186,430).

With respect to Claims 1 and 7-9, Zweighaft, Figure 1, teaches a buckler assembly comprising a retainer member 118 and a sensor assembly 120 adjacent to the retainer member.

With respect to Claim 13-14, the method described in these claims would inherently result from the use of buckler system of Zweighaft as advanced above.

Allowable Subject Matter

Claims 2-6, 10-12 and 15-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
